Dear colleague,

We are pleased to announce the **2nd International Course of the GRECMIP** (Mini Invasive Foot and Ankle Study Group) in cooperation with the French Society of Arthroscopy (SFA) and the European School of Surgery of Paris. This International Course focuses on the latest techniques of arthroscopy and minimally invasive surgery of the foot and ankle. The 2 day course features cadaveric laboratory sessions and lectures. In addition, you will have free access to the live surgery day on 8th May. An international faculty includes experts renown for their specialised interest in the foot and ankle surgery.

The 2 days concentrate on lectures supporting practical hands-on cadaver workshops, covering forefoot and ankle/hindfoot disorders, including tendoscopy. The course is limited to a small number of participants to enable personal interaction with faculty and cadavers and it is aimed at surgeons specialising in foot and ankle and arthroscopic surgery.

The course is affiliated to the International **Society for Arthroscopy, Knee Surgery, and Orthopaedic Sports medicine** (ISAKOS).

We look forward to seeing you in Paris

Regards

J. Calder
